Kahr® Introduces Attractive Black Carbon Fiber 9mm

Greeley, PA – Kahr Firearms Group is proud to introduce the latest finish for their ever popular CW9, the Black Carbon Fiber. The textured weave provides a real 3D dimensional appearance to the 9mm and the textured grip feels more stable in your hand.

This pistol features a 3.6” barrel with conventional rifling and 1-10 right-hand twist, a polymer frame with black carbon fiber print, and a matte stainless steel slide. The gun measures just 5.9” in overall length, 4.5” in height and weighs 15.8 oz. This is the only firearm in the entire Kahr product line that has a drift adjustable white 3-dot sight. It offers a trigger cocking DAO, lock-breach, “Browning” type recoil lug and passive striker block with no magazine disconnect. Capacity is 7+1 and MSRP is \$495.

For more information about any of the fine Kahr Arms products, visit www.kahr.com or visit your nearest dealer today.
