NEW PRODUCTS 2026

Engineered for superior control and concealment, the Kahr X9[®] Ported is a double-stack, sub-compact 9mm designed to provide full-sized performance in a compact footprint. This model features a matte black stainless slide with a factory Holosun[®] K optics-ready cut seated on a durable polymer frame, offering a modern platform for red-dot shooters.

The latest feature is its integrated "Ported" barrel and slide design, which effectively vents gases to flatten muzzle rise for faster, more accurate follow-up shots without increasing the overall size of the firearm.

The X9 Ported maintains the signature smooth Kahr trigger and adds aggressive grip texturing to ensure a secure hold under any conditions. For tactical versatility, the frame includes a standard Picatinny accessory rail for lights or lasers. Chambered in 9mm, this high-performance package comes ready for duty or personal defense.
